The Institute for Diversity and Health Equity, an affiliate of the American Hospital Association, is dedicated to advancing equity, diversity, and inclusion in health care.

The Institute works to empower health care organizations to ensure equitable care by:

- Engaging leaders to raise voices and standards in the field.
- Educating members to develop culturally competent organizations, and to use data to drive decisions.
- Leveraging partnerships to advance workforce diversity and inclusion, and to eliminate health care disparities.

Take advantage of an outstanding opportunity to connect with the decision-makers who are leading diversity, inclusion, and equity health care programs within their organizations.

Sponsorship and exhibiting at the Institute for Diversity’s national conference will put your organization directly in front of more than 300 C-Suite health care executives from a range of areas, including governance, human resources, and other areas of the organization addressing the challenges of diversity and equity in health care management and delivery.
